

Safety

- V001 Danger Signs**
Shows a compelling real-life story that creatively illustrates the consequences, financial constraints, and safety issues involved with roadway sign vandalism. Features interviews and actual news footage of sign vandalism cases from across the nation. Brings to light the unfortunate consequences of those acts, and shows what regions across the country are doing to combat these crimes, as well as what any citizen can do to help eliminate sign vandalism.
- V007 Safe Tree and Brush Removal**
This video demonstrates chain saw safety and maintenance, sawing techniques, falling trees and trimming brush.
- V019 Looking Back**
This is an excellent video illustrating the need for observing safety procedures on work sites when working near construction equipment.
- V034 LP Gas: Know the Facts**
Focuses on the proper handling and use of liquefied petroleum gas, proper storage and transportation, leak detection, and inspection.
- V035 Vault Safety - Confined Space**
This video reviews safety tips and safety devices used when working in manholes and confined spaces. Offers information on the Tri-tector which reads the amount of oxygen, chemical, and gas present.
- V037 A New Way to Lift**
Describes a safe and proper procedure for lifting heavy objects helping to minimize back injuries.
- V050 Professional Tree Care Safety: Equipment Safety**
Safety considerations for use of aerial lifts, stump cutters, tree cranes, chippers and chain saws. How to work with various types of tree care equipment in a manner that reduces injury. Work site traffic control.
- V051 Maintenance Welding: Welding Safety & Tank Repair**
This video covers fire hazards, hazard prevention, extinguishing fires, body and eye protection. The tank repair section explains various non-welding methods of tank repair and the proper procedure for the dangerous task of welding or cutting a tank.
- V052 Maintenance Welding: Gas Welding/Metal Identification**
This video explains the proper maintenance of gas welding equipment (tanks, regulators, hoses, torches) and regular setup. It also demonstrates techniques for cutting various types of metal stock, fusion welding, and brazing. The Metal Identification section demonstrates metal identification using chemicals, flame, or the spark test.
- V053 Maintenance Welding: Arc Welding**
This video explains how an arc welder works (AC and DC), welder setup, and special safety issues (open circuit voltage, ventilation, eye and body protection). It also describes the various electrodes and their uses.
- V080 Sudden Change in Plans**
- V091 Breakaway Timber Utility Poles**
Shows crash test results and actual installation by a utility crew of the breakaway apparatus.
- V113 Night Lights: How Retroreflectivity Makes Our Roads Safer**
This video explains what is, what materials are used in the construction of signs, and their value to the driver in bad weather, also discusses updating and sign maintenance.
- V126 Paths of Thunder - Safety at Railroad Crossings**
Discusses safe driving practices and the use of common sense when negotiating railroad crossings.
- V139 Chain Saw Selection, Maintenance, Use and Safety**
2 Part Video. This is a thorough video showing safety aspects of selection, maintenance and operation of a chain saw.
- V140 Underground Safety - Trench Shoring**
Reviews several types of shoring and provides rules for their correct use.
- V151 Hazardous Material: Design, Construction, Maintenance**
Hazardous materials encountered in different areas of highway construction and how to protect yourself and others.

Safety

- V173 Mailboxes May be Hazardous to Your Health**
Examples of acceptable supports for single and multiple box installations. Crash tests illustrate the dangers of many typical installations
- V503 Hand Signals For Crane Operation**
This video illustrates the correct hand signals to use when guiding a crane operator.
- V505 Underground Safety: Personal Protection**
This video illustrates personal protection practices to follow when working underground.
- V506 Back To Basics: Back Injury Prevention**
Video shows helpful suggestions to prevent back injury.
- V507 Tool Box Talks: Scaffold Safety**
This video provides safety tips to follow when working on or near scaffolds.
- V508 Avoid Hot Mix Hazards: Working Safely with Hot Mix**
This video shows how to work safely when using hot mix asphalt.
- V509 THE RULES OF THE GAME: Employee Safety Orientation**
This video is based on building construction safety but can be applied to highway construction and maintenance operations. Some valuable safety information is provided.
- V511 Drugs at Work**
The human and monetary costs and consequences associated with drugs in the workplace. The Drug Free Workplace Program is also discussed.
- V512 Hazard Communication**
Right to Know information regarding chemicals present in the workplace. Addresses training, labeling, and containing devices
- V513 It's Everyone's Concern**
This video examines some security measures that may be encountered in public buildings and discusses why they are necessary. Simple tools are given to ensure the peace of mind that comes with working in a safe and secure public building.
- V521 On Solid Ground**
Describes the importance of trench shoring and safety steps.
- V534 Construction Trenching and Shoring: Hard Hat Series**
OSHA estimates that approximately 90 deaths occur every year because someone didn't know basic trenching and shoring safety guidelines. The practical safeguards covered here can help prevent these needless casualties. Topics include: Evaluating an excavation site, Effective worker protection systems, and Emergency response.
- V535 Defensive Driving for Government Employees**
This new video program looks at techniques to help prevent accidents from happening, and in the case of unavoidable accidents, help lessen their severity. Topics include: What Is Defensive Driving?; Respect for the Vehicle; Your Responsibility as a Driver; Proper/Safe Driving Techniques; Seat Belts; Driving in Poor Weather; Speeding, Right-of-way, Passing, Tailgating; and Distractions & Road Rage.
- V536 PPE: Don't Start Work Without It (Safety 101)**
Learn to use the right equipment for each job, and use it correctly. Topics include: Eye and Face Protection; Hearing Protection; Hand & Foot Protection; Basic PPE Rules.
- V537 Construction Lockout/Tagout**
Preventing unexpected start-ups of equipment during servicing and maintenance is as easy as the six-step safety procedure summarized in this video program. Topics include: How Lockout/Tagout Systems Work; When to Use Lockout/Tagout Procedures; Six Steps Required in Lockout/Tagout Process.
- V538 Construction Confined Space Entry**
Working safely in a confined space requires learning the necessary skills to prevent or escape dangerous, or even fatal accidents. Preparation begins with this overview: Identifying Confined Spaces & Their Hazards; OSHA's Confined Entry Permit Program; Duties of Confined Space Entry Team.

Safety

V541 Heat Stress

This video program focuses on preventing illnesses and minimizing safety hazards. Complies with NIOSH and OSHA recommendations. Topics include: Hazards of Hot Environments and First Aid.

V542 Construction Fall Protection: Get Arrested!

This new program will help your employees work safer and smarter. It will also train employees on what's new, what's in and what's out, as far as fall arrest equipment and safety procedures go. Topics include: Requirements for Guardrail Construction, Strength, & Minimum Height Standards; Proper Anchorage Techniques; When & How to Use Lifelines & Positioning Devices.

V543 Winter Safety

Freezing temperatures and icy roads. They're not only uncomfortable - they can be deadly. Either on the job or during recreational time, winter weather can pose special dangers to everyone. Topics include: Signs & Treatment of Hypothermia & Frostbite; Prevention of Hypothermia & Frostbite; and Off the Job Winter Safety.

V547 Trenching and Shoring: The "Hole" Story

Review of OSHA's trenching requirements for cave-in prevention and worker safety.

V549 Back Safety: Lift Well, Live Well

This video will show you how you can "head off back pain" when you use your head and remember to protect your back from stress.

V553 Chainsaw Sharpening

This video shows that proper chain saw sharpening increases safety as well as efficiency.

V555 Safe and Secure

Coastal's "HazMat: Safe And Secure" video examines the types of threats that exist for facilities that manufacture, store, use or transport hazardous materials. It covers the details of a Security Vulnerability Analysis, as well as tips to make your facility safer and more secure.

V557 Crisis Under Control

OSHA's 1910.38 requires that each company develop a workable Emergency Action Plan. With the new threats facing our society today, such a plan is required not only for compliance, but also for survival. Make sure your organization has a well thought out plan in place by following the guidelines provided in this program.

V559 Sensible Wood Cutting: Tips from the Pros

This video provides some basic tips and techniques that can make your cutting experience safer and more productive. It covers: Personal Protective Gear, Safety Features of Husqvarna Chain Saws, Making a Cutting Plan, and Various Felling Techniques.
